Problem Solving

Gadisa Abdisa

Full-Stack Developer(MERN)

I am a full-stack web developer, honing my skills through various projects, tackling real-world problems while enhancing my capabilities in web development. I'm a tech enthusiast driven by a passion for problem-solving, committed to continual self-improvement, and dedicated to expanding my knowledge in the ever-evolving tech landscape. I'm eager to collaborate and create something truly remarkable together.

Experience

A2SV| Africa To Silicon Valley
Nov,2023-Present

- Africa to Silicon Valley upskills high-potential university students, connects them with opportunities at top tech companies around the world, and creates digital solutions to urgent problems in their home countries.
- Actively engage in regular study sessions and discussions focused on data structures, algorithms, and problem-solving techniques.
- Collaborate with peers to tackle algorithmic challenges and enhance problem-solving skills.
- Explore various coding platforms and participate in coding competitions to apply theoretical knowledge practically.

Projects

Evangadi Forum Full-Stack App
2024

The Evangadi Forum is a thriving community hub tailored to facilitate programming-related inquiries and responses. It features an aesthetically pleasing and responsive user interface crafted with React.js and Bootstrap CSS, which streamlines the posting and viewing of questions and answers while ensuring optimal accessibility across various devices. The backend was developed using Node.js, Express.js, and MySQL, incorporating user authentication and authorization functionalities to ensure secure access and participation, and securely storing user information, questions, and answers using relational database management systems.

Amazon Clone Full-Stack App
2024

The Amazon clone is a full-stack replica of the Amazon website, developed using React.js, CSS, Node.js, and Express. It employs Firebase database and authentication services for seamless functionality and integrates the Stripe payment system to ensure secure transactions. Employing responsive design principles, the project delivers a seamless user experience across multiple devices.

Netflix Clone
2024

- Developed a Netflix clone using ReactJS with features resembling the popular streaming platform.
- Integrated Movie Database API to fetch movie data, including titles, descriptions, and poster images.
- Implemented React Trailer library to fetch movie trailers from YouTube for an enhanced user experience.

Hospital Records Management System

2023

- Utilized C++ file handling to store and manage patient records securely.
- Designed and implemented algorithms for searching and sorting patient data, optimizing performance.

Certificate

Full Stack Web Development in MERN

Evangadi Tech

June 2023 - February 2024

- Successfully completed an intensive program covering Full Stack Web Development using the MERN stack (MongoDB, Express.js, React, Node.js).
- Acquired hands-on experience in building dynamic and responsive web applications from scratch.
- Demonstrated proficiency in designing and deploying RESTful APIs, integrating databases, and implementing user authentication systems.
- Developed practical skills in front-end and back-end development, emphasizing modern web development best practices and methodologies.

Life Skills Training

Addis Ababa University

Duration: 1 Month

- Successfully completed a comprehensive life skills training program at Addis Ababa University.
- Developed essential life skills including communication, problem-solving, decision-making, and interpersonal skills.
- Acquired valuable knowledge and techniques for personal development, self-awareness, and emotional intelligence
